# Revision history

---

**January 29, 1990**

Standard, release 1.0

**October 19, 1990**

Standard, release 2.0

**December 1, 1991**

Standard, release 3.0 (release to CD-ROM only).

**August 1, 1993**

Standard, release 4.0. This document is reissued to update and expand information on Meridian 1 power systems, and to include information pertaining to system option 21E, option 81, and the NT7D67CB PDU used in DC systems.

**April 1, 1994**

Standard, release 5.0. This document is reissued to update and expand information on Meridian 1 power systems, and to include information pertaining to Meridian 1 option 61C and the information on NT0R72 Rectifier as a replacement for the older NT6D52 Rectifiers in an existing NT7D12 Rectifier Rack Assembly. Changes are indicated with change bars.

**December 1994**

Standard, release 6.0. This document is reissued to update information pertaining to Meridian 1 option 51C. Changes are indicated with change bars in the margins.

**July 1995**

Standard, release 7.00. This document is reissued to include international information to create a global NTP and update information pertaining to Meridian 1 option 81C. Changes are indicated with change bars in the margins.

**December 1995**

Standard, release 8.00. This document is reissued to include information on the System 600/48 Power Plant.

**October 1997**

Standard, release 9.00. Changes are noted by revision bars in the margins.
